Carlton J. Perry, M.D.

Dr. Carlton Perry graduated from the University of Texas Medical Branch at Galveston, Texas. Dr. Perry completed a two year fellowship in Plastic & Reconstructive Surgery at the Department of Plastic Surgery at University of Oklahoma Health Science Center in Oklahoma City, Oklahoma. While in Oklahoma, Dr. Perry received the Governor's Commendation for Heroism from the State of Oklahoma for outstanding service in his field and later was involved in the treatment of the victims of the Oklahoma City bombing. Dr. Perry has extensive experience in reconstructive plastic surgery, as well as peripheral nerve surgery. Dr. Perry spent time at the prestigious Lennox Hill Hospital in New York City. Following completion of his formal training, Dr. Perry spent the next two years in Europe working, studying and collaborating with plastic surgeons in Spain, France and Italy. It was during this time in Europe that Dr. Perry visited several small, boutique plastic surgery centers that were to provide him with the inspiration on which he would later found River Oaks Plastic Surgery Center – a facility unlike any other in Houston, Texas. The center provides an old world feeling of warmth and confidence while providing care at the highest levels of technology and quality.
